

managed washroom solutions

better standards that everyone notices

Ensign Services provide a range of products to maintain everybody's hygiene and comfort and ensure a clean, fresh washroom environment day after day. Washrooms leave a lasting impression. Whether it's used by employees, customers or visitors, your washroom says a lot about the standards you uphold.

managed washroom solutions

Ensign Services install and maintain easy to use continuous towel units, soap dispensers and air fresheners in public, commercial, institutional and industrial washroom facilities. We help you ensure the essential health, safety and comfort of everybody who uses these facilities.

our australian track record

For over 75 years, Australian owned Ensign Services has led the way in the provision of washroom service solutions and hygiene technology. No matter what size your business, Ensign Services has the experience and resources to provide the right level of product and service to suit your needs.

quality that counts

Ensign Services uphold Total Quality Management principles and our operations are accredited to the national standard AS/NZS ISO 9001:2000.

There is no upfront installation or ongoing maintenance costs, so you can confidently leave your washroom services in our care knowing we'll look after them for you.

continuous towels

Continuous towels can be more effective, hygienic and environmentally friendly than other forms of hand drying. Our contemporary units dispense a clean, absorbent, cotton towel that's just right for a single use. The units also feature a separate chamber design which avoids contact between soiled and fresh towelling for a cleaner feeling overall.

Our towel units can provide substantial cost savings when compared with other methods of hand drying. Plus they are 100% recyclable with no disposable waste costs.

liquid soaps & soap dispensers

Personal hygiene, particularly hand washing, is critical to targeting the prevention of contamination hazards. Ensign Services' low maintenance liquid soap dispensers make it easy to keep hands clean, hygienic and well cared for.

You can choose the right soap and lotion formulation to suit your washroom and workplace.

air fresheners

Ensign Services' range of air fresheners deliver effective, long lasting neutralisation of odours.

tea towels

Ensign Services provide clean tea towels to reinforce your hygiene standards in kitchens, cafeterias and staff rooms. Often overlooked, our tea towel rental service makes it easy and economical to have clean, fresh cloths available for your staff.

We also offer a variety of carefully laundered hand towels that can be replaced according to your washroom usage.

customised service

Ensign Services will tailor a washroom program to meet your company needs, including service calls to remove soiled items and delivery of clean, fresh supplies.

Your dedicated Ensign Services' customer service representative will visit your site at an agreed frequency to replace and replenish towels, soap and air freshener product.

Ongoing maintenance and inspections are conducted to ensure satisfactory equipment performance. Free maintenance service calls within 24 hours, during the normal business week, are also available.

why Ensign Services for washrooms?

- no capital outlay
- regular, reliable servicing
- hygienic
